

Seamless Welding Fittings

1. True diameter maintained throughout the smooth bore for unrestricted flow.
2. Ends are true and square.
3. Bevels and lands accurately machined for good welding.
4. Clear identification of size, schedule or nominal wall thickness, material and heat code.
5. Full, uniform wall thickness for maximum strength.

MATERIAL AND MANUFACTURING STANDARDS

The manufacture of welding fittings is governed by industry standards established by such associations as 1) the American Society for Testing and Materials (ASTM): 2) the American National Standards Institute (ANSI): 3) the Manufacturer's Standardization Society of the Valve and Fittings Industry (MSS): 4) the Pipe Fabrication Institute (PFI): and 5) the Canadian Standards Association (CSA). They cover specifications for materials, methods of manufacture, dimensions and quality control procedures. All CCTF welding fittings conform to one or more of these standards.

ASTM STANDARDS

CCTF carbon steel welding fittings are manufactured from seamless steel tubing and furnished in accordance with ASTM Standard A-234, with material specifications in accordance with ASTM A-106, Grade B, for fittings made from pipe; ASTM A-515, Grade 65 or 70, for fittings made from plate.

CCTF alloy steel welding fittings are furnished in accordance with ASTM standard A-234, with materials specification including A-335, Grade P1, carbon-molybdenum, and Grade P12, P11, P22, P5, P7; P9 chrome molybdenum, for fittings made from pipe.

ASTM A-204 Grade B, carbon molybdenum, and ASTM A-387 Grades 12, 11, 22, 5, 7, 9 chrome molybdenum for fittings made from plate.

CCTF welding fittings are also available in accordance with ASTM specification A-420 covering low-temperature service, down to -150°F (-101°C).

CCTF stainless steel welding fittings are manufactured and available in the following types: 304, 304L, 316, 316L and 347. They are furnished in accordance with ASTM Standard A-403, with material specifications to ASTM A-312 covering fittings made from pipe, and A-240 for fittings made from plate. Refer to CCTF catalogue "Stainless Steel Welding Fittings".

ANSI, MSS, ASME and CSA Standards

ASME/ANSI and MSS standards govern fitting dimensions and tolerances, ASME/ANSI B16.9 "Wrought Steel Buttwelding Fittings", is the basic standard. It covers steel butt-welding fittings sizes NPS 1/2 through NPS 48 (DN 15 through DN 1200).

Other ASME/ANSI and MSS standards, written to supplement B16.9, are as follows:

ASME/ANSI B16.25:	Butt-welding Ends
ASME/ANSI B16.28:	Butt-welding short radius elbows and returns
MSS SP-43:	Light-wall stainless steel fittings, NPS 3/4 through NPS 24 (DN 20 through DN 600)
MSS SP-75:	High Test Wrought Welding Fittings

The following codes and standards influence the manufacture of welding fittings, where applicable.

ASME/ANSI B31.1:	Power piping
ASME/ANSI B31.3:	Petroleum refinery piping
ASME/ANSI B31.4:	Liquid petroleum transportation piping system
ASME/ANSI B31.5:	Refrigeration piping
ASME/ANSI B31.8:	Gas transmission and distribution piping systems
ANSI/ASME B36.10M:	Welded and seamless wrought steel pipe
ANSI/ASME B36.19M:	Stainless steel pipe
CSA Z183:	Oil pipe line transportation systems
CSA Z184:	Gas pipe line systems
CAN3-Z245.11-M91:	Requirements for wrought steel butt welding fittings
ASME:	Boiler and pressure vessel code

SPECIAL METALS

High Test Steel. High test pipe line welding fittings, conforming to CSA Standard CAN3-Z245.11 or MSS SP-75, are available with physical properties to match pipe with *42,000, 46,000, 52,000, 60,000, 65,000, and over p.s.i. minimum yield strengths.

Other Ferrous Alloys. Fittings are available manufactured from ASTM alloy specifications other than those listed in the "ASTM Standards" above.

Non-Ferrous Metals. Fittings of relatively common metals, such as aluminum, nickel, copper, etc., can be readily furnished; production is limited only by availability of raw materials. The same is true of less common metals, such as the various grades of Hastelloy, Inconel, Incoloy, Monel, Alloy-20, rare types of stainless steel and other unusual analyses.

*Equals 290, 317, 359, 414, 448 Mpa, respectively.

METRIC EQUIVALENTS

The International System (SI) metric equivalent of British units are shown throughout this catalogue.

NPS (Nominal Pipe Size)	= DN, Δ (Nominal Diameter)
Operating Pressure Class	= PN, Δ (Pressure Number)
1 inch	= 25.4 millimetres
1 pound, weight	= 0.4536 kilograms
1 psi	= 0.06895 bars
1 psi, stress	= 0.006895 megapascals (MPa)

Δ From the SI designations, Diamètre Nominal and Pression Nominale.

(1) May be furnished as 1.5 in (38mm) at the manufacturer's option.
 (2) 3-1/2XXS is not specified in ASME/ANSI B36.10M.
 (Δ) Produced from X-rayed, stress-relieved welded pipe. Welds are 100% radiographed in accordance with the requirements of ASME Boiler & Pressure Vessel Code.
 These fittings are also available in other sizes and/or wall thicknesses.

(1) NPS 30 (DN 750) sizes are not covered by ASME/ANSI B16.9

(2) Sizes NPS 8 (DN 200) and larger may not be supplied as seamless.

These fittings are also available in other sizes and/or wall thicknesses.

(1) These sizes of Short Radius Returns are not available.

(2) Available by special order only.

(3) These sizes not covered by ASME/ANSI B16.9 or ASME/ANSI B16.28.

Particulars and specifications of Long Radius, Sch. 160 and XXS, and Short Radius XXS available on request.

These fittings are also available in other sizes and/or wall thicknesses.

Tees size 20 NPS (DN 500) and smaller, and Crosses size 16 NPS (DN 400) and smaller, are normally furnished as seamless. Larger size non-seamless Tees and Crosses are produced from X-rayed, stress relieved welded pipe. Welds are 100% radiographed in accordance with the requirements of ASME Boiler & Pressure Vessel Code.

*Reduced outlet crosses available on request. These fittings are also available in other sizes and/or wall thicknesses.

When ordering Reducing Tees, specify the run pipe size first, followed by the outlet size. Example 2 x 2 x 1.
 When ordering Reducers, specify the Large End first, followed by the Small End size and the type. Example: 2 x 1 eccentric.
 These fittings are also available in other sizes and/or wall thicknesses.
 Wall thickness and other pipe size data are in accordance with ASME/ANSI B36.10M. Refer to page 6.

#This size of Reducing Outlet Tee is not covered in ANSI B16.9
 □ This size of Reducer is not covered in ANSI B16.9
 □ This size of Reducer supplied concentric, only.

Tees size 20 NPS (DN 500) and smaller, and Reducers size 24 NPS (DN 600) and smaller, are normally furnished as seamless. Larger size non-seamless Tees and Reducers are produced from X-rayed, stress relieved welded pipe. Welds are 100% radiographed in accordance with the requirements of the ASME Boiler & Pressure Vessel Code.

Saddles are used to reinforce intersecting welded junctions and are not intended to be used as pressure containing fittings. A vent hole prevents pressure build-up of welding gasses between saddle and header. Saddles are made from welding grade seamless steel, and are fully normalized.

Laterals are fabricated from Grade B standard and extra strong seamless pipe.

The working pressure of any fabricated Lateral must be rated at only 40% of the allowable working pressure established for the pipe from which the lateral is made. Dimensions and price of 100% strength laterals will be furnished on request.

Laterals are also available in other materials, sizes and/or wall thicknesses.

*Reducing laterals can be supplied with the same centre-to-end dimensions as shown above.

BUTT WELDING ENDS

ASME/ANSI B16.9

For fittings with wall thickness equal to that of the pipe to which they are to be welded.

Nominal Wall Thickness (T)	End Preparation
Less than x^*	Cut square or slightly camfer, at mfr's option
x^* to .88 (22)	Plain bevel as in sketch (a).
More than .88 (22)	Compound bevel as in sketch (b).

$x^* = 0.19$ (5) for carbon steel or ferritic alloy steel and 0.12 (4) for austenitic alloy steel.

Millimetres in brackets.

SIZE RANGES

ASME/ANSI B16.9

The following size ranges of Welding Fittings are covered by ANSI B16.9. "Steel Butt-Welding Fittings."

- 90° Long Radius Elbows 1/2" to 48" incl.
- 45° Long Radius Elbows 1/2" to 48" incl.
- 90° Long Radius Reducing Elbows 2" to 24" incl.
- Tees, Straight and Reducing Outlets 1/2" to 48" incl.
- Crosses, Straight and Reducing Outlets 1/2" to 48" incl.
- Welding Caps 1/2" to 48" incl.
- Lap-Joint Stub Ends 1/2" to 24" incl.
- Welding Reducers 3/4" to 48" incl.
- Long Radius Return Bends 1/2" to 24" incl.

Although great care has been taken in compiling the information contained in this catalogue, CCTF does not accept responsibility for the consequences of any errors, nor for the effects of any subsequent changes made by the various sources of data.
